

MIXING INSTRUCTIONS

This package contains the spices for the curing mix. You should freshly mix the amount of material required for the amount of meat you want to cure, just prior to use.

If you do not need an entire package of Morton® Sugar Cure® mix for a particular recipe or must make more than one application, prepare a smaller amount by blending 1-1/4 teaspoons of the accompanying spice mix with (1) cup of unspiced Morton® Sugar Cure® mix. If any portion of the complete mix with spice is not used within a few days, it should be discarded. It is not necessary to mix the spices with the cure mix if spices are not desired. The unspiced Sugar Cure mix contains the curing agents and may be used alone.

**DO NOT STORE MIXED INGREDIENTS
FOR FUTURE USE.**
